## Church of Oak Distillery Monasterevin, Co. Kildare

Featured Products: **Ready Mix Concrete, Concrete Blocks, Bulk Aggregates, Rapid Set Jointing Mortar, ClimaPave Newgrange**

The Church of Oak Distillery is a landmark restoration and transformation of the historic Ballykelly Mills on the banks of the Grand Canal in Monasterevin, Co. Kildare. This ambitious redevelopment breathes new life into a grain mill dating back to the early 1800s, harmonising heritage preservation with modern construction and sustainable design.

The highlight of the project is the extension of the original building, and the integration of high-grade architectural fair faced concrete into the design of the Church of Oak Distillery. Completed using Kilsaran's high-grade architectural concrete to achieve the project's aesthetic and structural goals, this redevelopment successfully integrates advanced concrete solutions to meet the demands of a modern distillery while preserving the structural integrity and historical significance of the original building.

This project also saw products from our KPRO and Paving and Walling divisions being supplied.

### **Concrete Products & Aggregates:**

Ready Mix Concrete

Concrete Blocks

Bulk Aggregates

### **KPRO:**

Street Rapid Setting Jointing Mortar

### **Paving:**

ClimaPave Newgrange Silver Granite 3 Size Mix in 80mm

ClimaPave Newgrange Black Granite 3 Size Mix in 80mm

### **Main Contractor:**

Ormonde Construction Limited

### **Architect:**

ODOS Architects

### **Engineer:**

JJ Campbell and Associates

### **Client:**

Jewelfield Limited
